

# Empire State Building Craft

✂ Cut out the building along the solid lines only; be careful not to cut along the dotted lines. Fold the craft along the dotted lines. You should have two pieces to make up the building. Tape the tabs to the other half where they belong (see finished craft). To form the top spire just fold along the dotted lines and tape the tab down forming a long thin pyramid. Tape the spire to the roof of the building as shown on the finished craft.
