GURLUNSI HUT

Roof

Color your hut as you would like. The Gurunsi use earthy colors like tans, orange-browns, and black as shown in the photos in your Travel Journals. This roof would be made of grass. Trim the pieces along their edges. Bring the two flat edges of the roof together to

make a cone shape. Tape those edges together. Next bring the shortends of the wall art together to form a circle. Place the roof on top of the walls and tape it in place from the inside.
