

MILES HIGH GOGGLES

To build Miles High's goggles, mount this page on cardstock or another sheet of paper to make it more sturdy. Or print on cardstock if your printer can handle that. Trim out each piece of art around the edges. Also trim out the circles inside the lenses. Tape or glue the bands together with the lighter grey under the dark grey, matching the C areas. Fold down the tabs around the

goggles. Match end A with tab A and adhere tab to inside or non-printed side of the band. Work your way around the goggles, conforming the band to the shape of the goggles and adhering the tabs to the band as you go. Match up end B with tab B. Cut the dotted whiteline slits in the band to slip in yarn or ribbon and tie around your head.
